

Good afternoon Chris,

I have been asked by the property committee to remind you that at our previous meeting we categorically informed you that no vehicles were to be allowed to drive up the path in Parish Wood this has happen for the last three days and the Town council consider this is an important issue. Please inform us of your intended actions.

Best regards

David

Hi David,

Over the years FBOG have bent over backwards to help the FFAS for the benefit of the residents of Filey, including allowing access over our land when requested. An agreement was made with SBC for access to the Tip via the Country Park. Unfortunately this still hasn't materialised, the last we heard the routes were still to be approved by Planning and the Contractors also hadn't made the ramp usable for vehicles. As we were working to a time frame set by the timber merchant re delivery this meant that the 4 tons of timber for the Heligoland had to go to site via Parish Wood, carried up by James Whittaker using a flatbed trailer. This was the only option left to us by SBC. We also had to get 39 x 20kg bags of postcrete plus all the fixings and tools required for building the Heligoland on site with Natural England kindly providing us with the use of one of their vehicles as none of our Members has a 4x4.

Yet again we were aggrieved with the aggressive tone that Filey Town Council approached us regarding an issue. We told you via the online Meeting what we would be doing as circumstances dictated, which unfortunately left us with no other alternative but to proceed as we did. We suggest you contact SBC to obtain an update on the routes across the FFAS.

Stay safe

Chris
