Paul / Martin,

Quote Ref. Q2167

Many thanks for taking the time to show me the work you would like pricing up on the footpath off Fir Tree Drive. I have priced up the work with an option on the type of stone. The local stone to the area is quite soft and when wet can be a bit clarty so you may want to consider using a harder stone but if comes from Leyburn so is more expensive.

- Mobilise to site and close off the path to the public
- Scrape off existing path and cast to one side.
- Import and lay type 1 stone at 75mm deep and compact.
- Ensure there is shape to the path so the water is thrown off where possible.
- Top dress with 25mm of 20mm to dust to act as a wearing course.

The cost for this work using locally sourced soft stone would be £7,640.12 + VAT

The cost for this work using hardstone from Leyburn would be £8,408.16 + VAT

I hope I have interpreted your requirements correctly but if you have any questions please do not hesitate to contact me.

Kind Regards

Angus Nicholson
